

***“Committed to.... Quality,
Service and Innovation”***

At Dallesport Foundry, we specialize in high chrome, white iron castings for the aggregate and wood industries. We offer O.E.M style replacement parts, as well as custom or improved design castings and components for better performance and wear life.

QUALITY

- Each heat is checked prior to pouring with spectrographic metals analyzer equipment to ensure alloy specification.
- All castings are Jig fit and randomly ultrasound tested prior to shipping.

At Dallesport Foundry we use state-of-the-art heat treating.

SERVICE

- In-house pattern facilities with the ability to build low cost quality patterns, for a quick turn around.
- Production up to 1000 lb. castings.
- 27% and 16% chrome white iron alloys. Heat treated or as cast.

- Wide variety of high performance and O.E.M style replacement parts.
- Quick turn around for R & D projects 2-4 week's average.

- 3D casting modeling and design.

- With 25 years of experience in the rock crushing industry, we can help design white iron castings to fit tough applications.
- High level of inventory on most VSI wear parts.

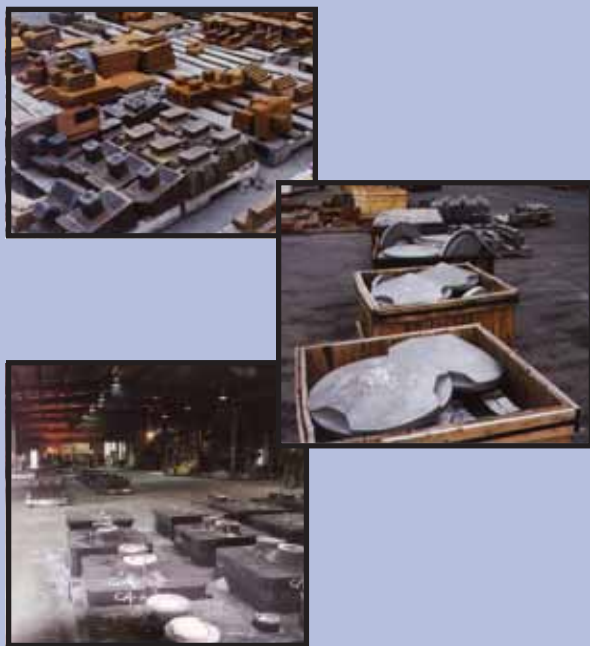

INNOVATION

At Dallesport Foundry we have over 25 years experience designing and manufacturing VSI parts. We use this experience to develop higher performance wear parts for VSI, HSI and Hammer Mill type crushers.

We will usually take an O.E.M. style part and redesign it to improve the wear life, or we can improve a casting to fit a specific customer's application. This is usually done by receiving a worn part or a picture of the customer's wear pattern. We then adjust the casting to improve the wear life with little or no additional cost to the customer.

We also have the ability to help you with the application of your crusher and replacement components.

Patent Pending

High chrome upper wear ring for ISC style VSI Crusher. Improves wear life up to 10 times.

Double pocket impeller for Canica style 80, 90, 100 & 105 VSI crushers. Improves life 2-4 times. Low cost alternative to ceramic shoes.

Rock eater 4 port rotor for all makes of VSI crushers.

Replacement impeller tables and anvil rings available for various types of VSI.
